

The NANO flush-mount frame enables seamless integration of the NANO fire detection and extinguishing control panel into flat surfaces. It provides a clean, unobtrusive appearance while maintaining full functionality and protection. Engineered for fast installation and long-term reliability, this compact adapter ensures secure mounting across a wide range of applications. For recessed installations, you can choose either full flush mounting with the enclosure retained, or installation without the enclosure to allow direct rear access to the connection terminals.

Dimension : 158 x 100 x 3mm W x H x D
Material : POM (polyacetal)
Part number : N2KB/FMF/NANO
Packet size : 5 pcs
